

EXPERIMENT – 6

ROLL NO: 240701359

NAME: Nikhil Vinayak P

USER INTERFACE AND DESIGN

Designing Different Layouts and Color Schemes for an App using GIMP

AIM

To experiment with different layouts and color schemes for a mobile application and collect user feedback on aesthetics and usability.

OBJECTIVE

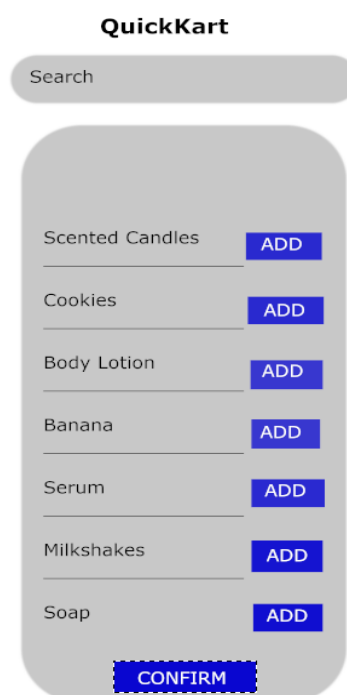

To design different application layouts using various color schemes and evaluate their visual appearance and usability.

PROCEDURE

- Created a mobile app interface for a grocery application (QuickKart)
- Designed a single layout consisting of title, search bar, product items, and buttons
- Developed three different themes by changing colors, text styles, and visual elements
- Compared the appearance and usability of each theme

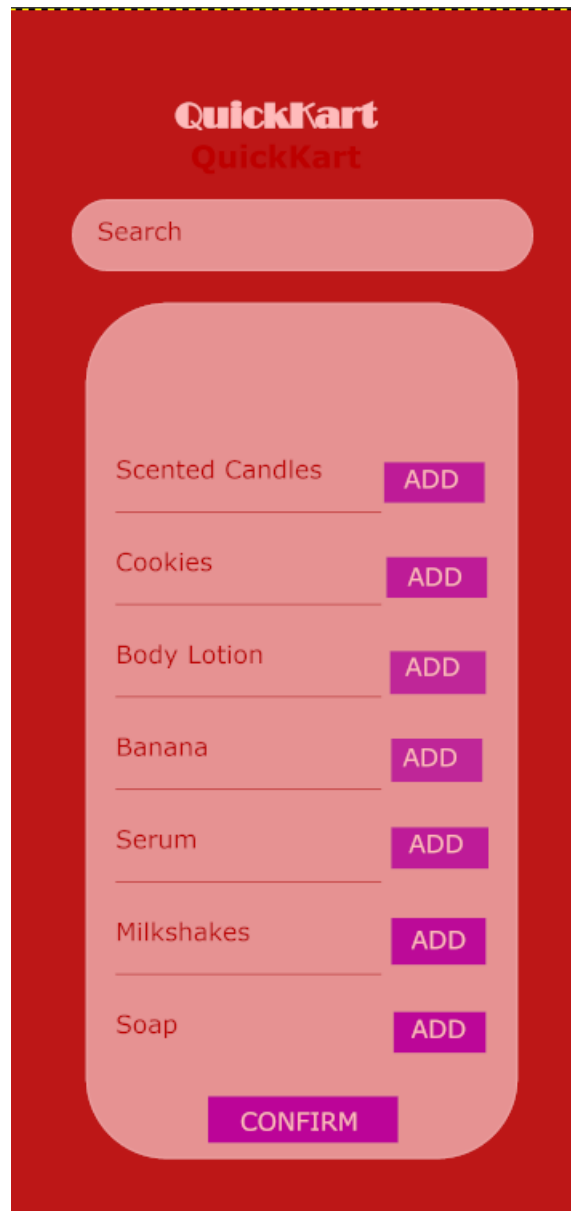

DESIGN DESCRIPTION

Screen 1 (Light Theme)

- Background: White
- Title: Black color (QuickKart)
- Search bar: Light grey rounded rectangle
- Product section: Light background with items displayed clearly
- Buttons: Dark blue (Add and Confirm)
- Provides a clean and simple interface

Screen 2 (Vibrant Red Theme)

- Background: Red
- Title: Pinkish-red tone
- Search bar and layout: Similar pink/red shades
- Product text: Red colored
- Buttons: Violet/magenta color
- Gives a bold and colorful appearance

Screen 3 (Warm Theme)

QuickKart

Search

Scented Candles ADD

Cookies ADD

Body Lotion ADD

Banana ADD

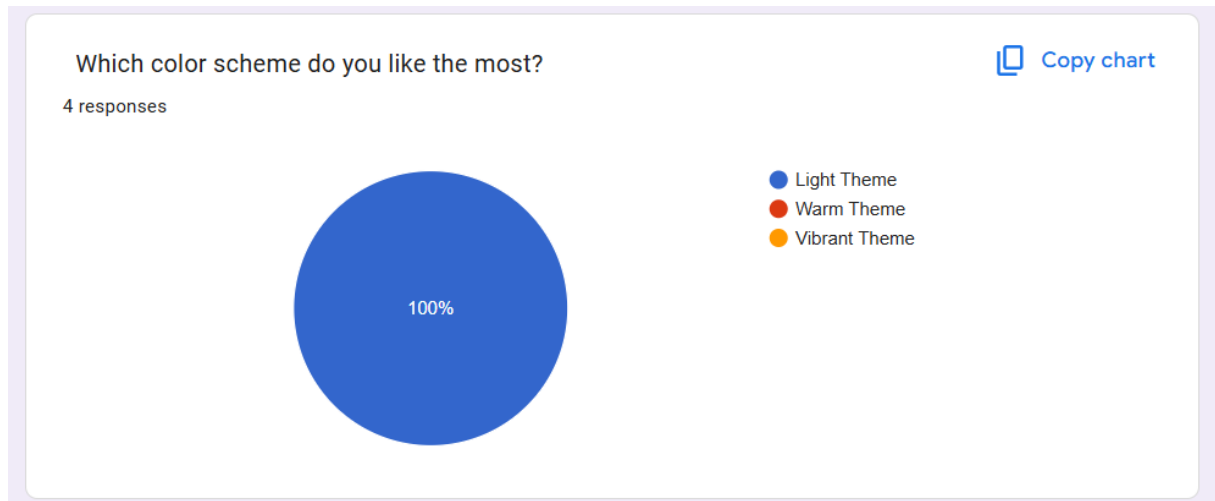

Serum ADD

Milkshakes ADD

Soap ADD

CONFIRM

- Background: Yellow-orange shade
- Outer box: Light rose color
- Title: Red (QuickKart)
- Search bar: Light red shade
- Product section: Very light orange/yellow box
- Product text: Red
- Buttons: Violet (Add and Confirm)
- Creates a warm and vibrant visual style

USER FEEDBACK AND ANALYSIS

Based on user opinion and visual evaluation:

- **Screen 1 (Light Theme)** was preferred the most
- Users found it **simple, clean, and easy to understand**
- The contrast between background and text made it **highly readable**
- Buttons were clearly visible and easy to identify
- It gave a **professional and familiar app-like appearance**
- **Screen 2** was considered too bright and slightly confusing due to strong colors
- **Screen 3** looked attractive but slightly less readable compared to Screen 1

FINAL OBSERVATION

The light theme (Screen 1) provided the best balance between aesthetics and usability, making it the most user-friendly design.

RESULT

Users preferred layouts with organized content and soft color schemes. Attractive visuals and proper color combinations improved usability and user experience.
