

EXPERIMENT – 3

ROLL NO: 240701359

NAME: Nikhil Vinayak P

USER INTERFACE AND DESIGN

Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using proto.io

AIM:

To design a mobile application prototype containing familiar and unfamiliar navigation elements and evaluate the ease of use among different user groups.

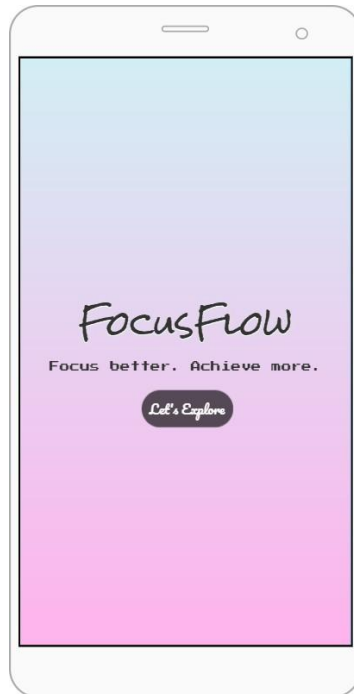

OBJECTIVE

- To create a mobile UI prototype with different navigation styles
- To compare user interaction with familiar and unfamiliar navigation elements.
- To analyze usability, learnability, and user satisfaction.
- To study navigation behavior in Human Computer Interaction (HCI).

PROBLEM STATEMENT:

Users interact more efficiently with familiar navigation patterns because they are easy to recognize and understand. Unfamiliar navigation elements may confuse users and reduce usability. This experiment aims to evaluate how different navigation styles affect user performance and ease of use.

Screen 1: App Introduction Page

FocusFlow – Focus better. Achieve more.

- When the prototype link is opened, the app name appears first.
- The subtitle appears slightly later to create a calm and aesthetic user experience.
- A button **“Let’s Explore”** is provided at the bottom.
- Clicking this button navigates to the Login page.

Familiar Elements:

1. **Call-to-Action Button (“Let’s Explore”)**
 - A common navigation element used to proceed to the next screen.
 - Clearly indicates starting the app journey.

Unfamiliar Element:

1. **Delayed Subtitle Animation**
 - The subtitle appears after a slight delay.
 - Used to create a smooth and modest visual experience.

Screen 2: Login Page

Displays “Welcome Back”.

Fields for:

- Email
- Password

“Login” button provided.

“Sign Up” link for users without an account.

Familiar Elements:

1. **Email & Password Fields**
 - Standard login inputs used in most applications.
2. **Login Button**
 - Used to authenticate user credentials.
3. **Sign Up Link**
 - Allows navigation to account creation page.

Navigation Behavior:

- Clicking **Login** → Navigates to Dashboard.
- Clicking **Sign Up** → Navigates to Sign Up page.

Screen 3: Sign Up Page

- Fields for:
 - Name
 - Email
 - Password
 - Select hours to study (Dropdown list)
- “Sign Up” button provided.
- “Login” link available if user already has an account.

CREATE ACCOUNT

Already have an account? [Login](#)

Name:

Email:

Password:

Select hours to study:

Hours ▾

Sign Up

Familiar Elements:

1. **Input Fields**
 - Name, email, password are common registration inputs.
2. **Dropdown List (Select Hours)**
 - Used to choose daily study goal.
3. **Sign Up Button**
 - Creates new user account.
4. **Login Redirect Link**
 - Helps users return to login page.

Unfamiliar Element:

1. **Study Goal Selection During Signup**
 - Instead of setting goals later, it is selected during account creation.

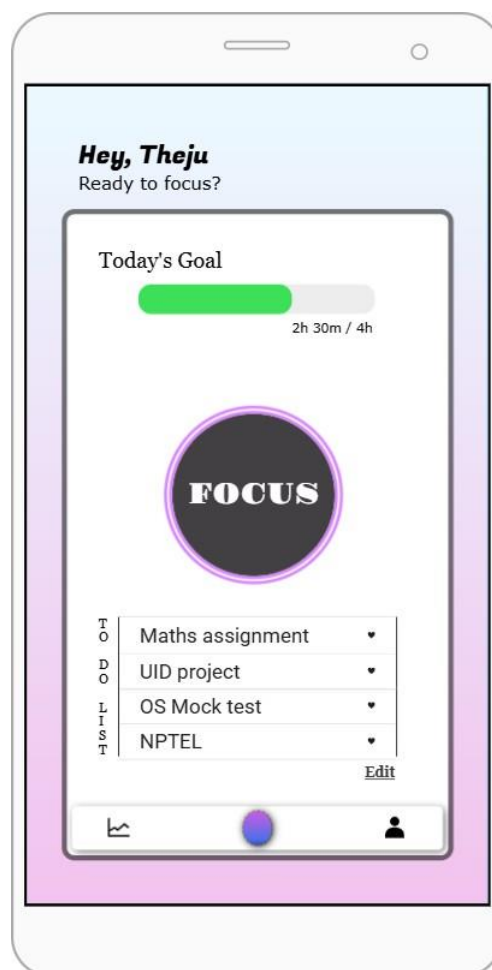

Navigation Behavior:

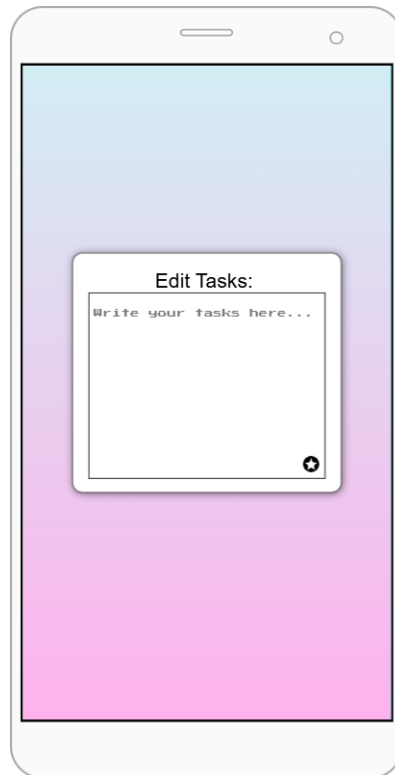

- Sign Up → Dashboard.
- Login link → Login page.

Screen 4: Dashboard Page

Displays:

- Greeting: “Hey, Theju – Ready to focus?”
- Today’s Goal Progress Bar (e.g., 2h 30m / 4h)
- Large circular **FOCUS** button at center
- To-do list
- Bottom navigation icons:
 - Left: Progress
 - Middle: Round button (Refresh)
 - Right: Profile

Familiar Elements:

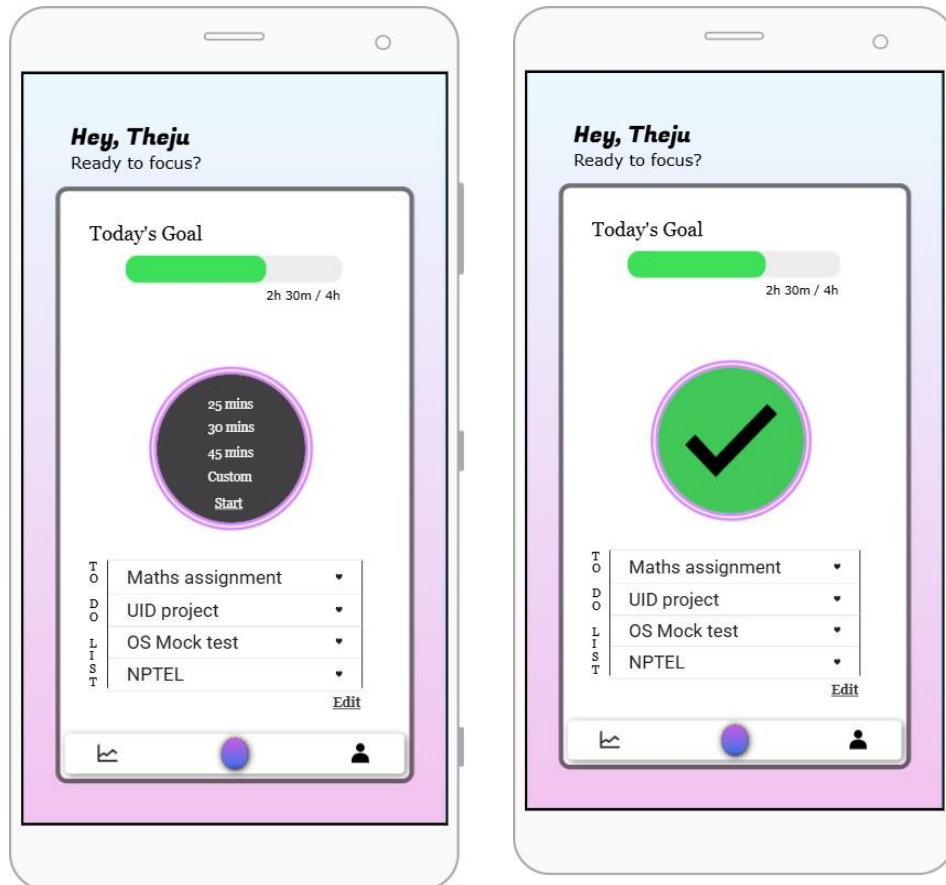

1. **Progress Bar**
 - Shows completion status of daily study goal.
 - Green bar increases as study time increases.
2. **To-Do List**
 - Displays tasks like:
 - Maths assignment
 - UID project
 - OS Mock test
 - NPTEL
 - Editable list.
3. **Navigation Icons (Bottom Bar)**
 - Left → Progress screen
 - Right → Profile screen

Unfamiliar Elements:

1. **Center Round Button (Refresh Function)**
 - Usually home buttons are placed at the center.
 - In this app, clicking the round button refreshes the dashboard.
 - This is intentionally unfamiliar navigation behavior.
2. **Heart Icon Instead of Tick for Task Completion**
 - Instead of using a traditional checkmark,
 - Users “heart” the task to mark it complete.
 - A creative but unconventional interaction.

3. Star Inside Circle Instead of “Done” Button

- After editing tasks, instead of a normal “Done” button,
- A star icon inside a circle saves changes.
- Functionally same as Done, visually different.

Focus Timer Interaction (Inside Dashboard)

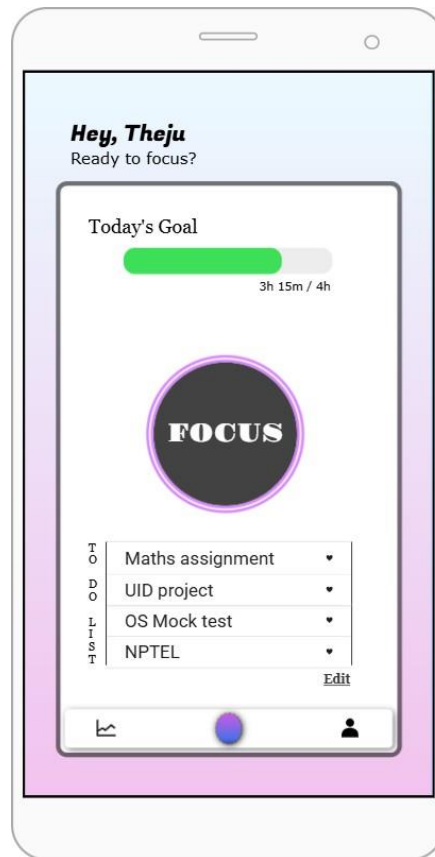

- Clicking the large circular **FOCUS** button:
 - Displays time options:
 - 25 mins
 - 30 mins
 - 45 mins
 - Custom
- Clicking “Start” begins the session.
- When timer completes:
 - A checkmark appears.
 - Progress bar updates automatically.

Familiar Elements:

1. Preset Timer Options
2. Completion Tick
3. Dynamic Progress Update

Unfamiliar Element:

1. Timer integrated inside central decorative circle instead of separate screen.

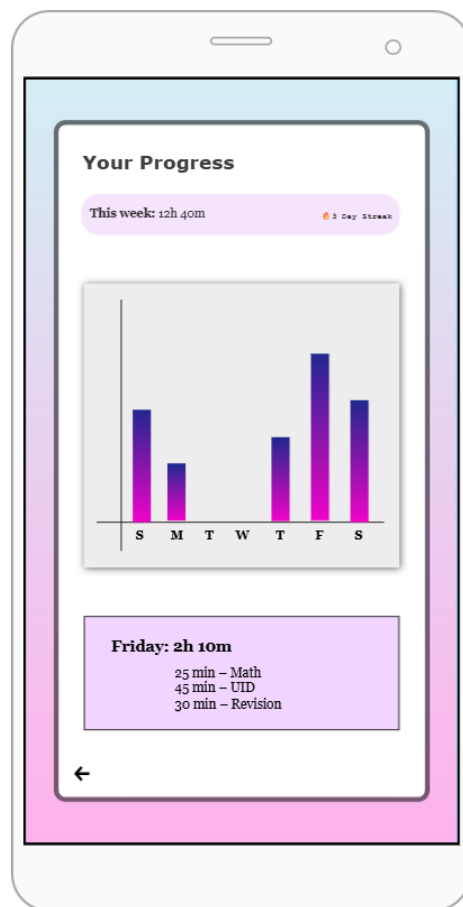

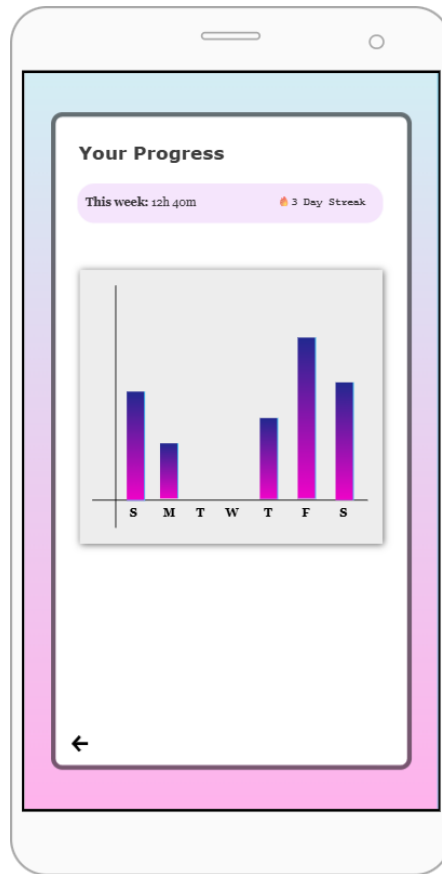

Screen 5: Progress Page

Accessible via bottom-left icon.

Displays:

- This week study time
- Streak count
- Bar chart (S M T W T F S)
- Clicking a specific bar:
 - Shows detailed breakdown
 - Example:
 - 25 min – Math
 - 45 min – UID
 - 30 min – Revision

Familiar Elements:

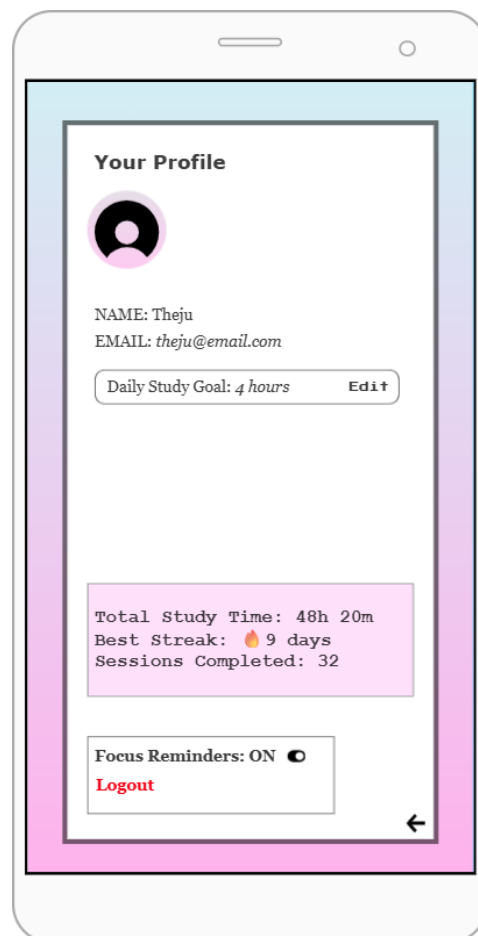

1. Bar Chart for Weekly Tracking
2. Streak Indicator
3. Clickable Data for Detailed View

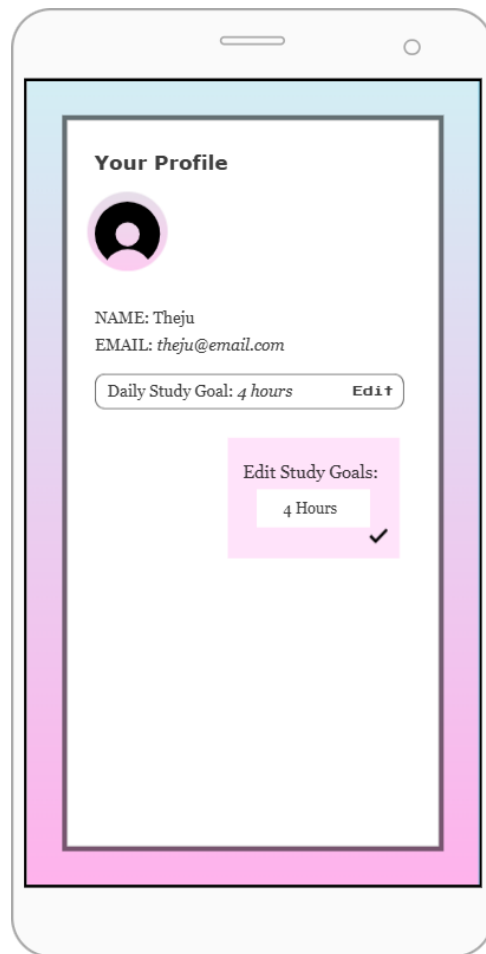

Screen 6: Profile Page

Accessible via bottom-right icon.

Displays:

- Avatar
- Name
- Email
- Daily Study Goal (Editable)
- Total Study Time
- Best Streak
- Sessions Completed
- Focus Reminder Toggle
- Logout Option

Familiar Elements:

1. Avatar & Profile Details
2. Editable Goal Setting
3. Toggle Switch (ON/OFF)
4. Logout Button

Unfamiliar Element:

1. Tick Icon to Save Goal Changes
 - Instead of "Save" text button,
 - A tick icon confirms changes.

Navigation Behavior:

- Logout → Returns to initial "Let's Explore" page.

RESULT:

The experiment showed that users completed tasks faster and with fewer errors using familiar navigation elements. Beginner users found unfamiliar navigation confusing, while experienced users adapted more quickly. Familiar navigation improved usability and user satisfaction.
